The primary reason for allowance of claim 33 is the claim limitation for extracting and decoding the encoded identifying mark from a segment of an image recording medium and accessing the memory to obtain data stored at the data location associated with the identifying mark, in combination with all the other claim limitations in total. The primary reason for allowance of claims 34-41 is the claim 34 limitation for a tracking memory having data stored therein associated with the identifying mark encoded on a segment of an image receiving surface, in combination with all the other claim limitations in total.
